

Nazarii Konechnyi

Software Developer

Dublin, Ireland · +353879644297 · nazar.konechniy2@gmail.com · linkedin.com/in/nazariik · github.com/NazariiKon

PROFILE

Dublin-based Computer Science student at Dublin City University, building full-stack web apps with React/TypeScript, .NET/FastAPI and PostgreSQL. I enjoy shipping end-to-end features from REST APIs and data models to responsive UIs and deployment. I care about reliability, performance and clean UX. Currently seeking software engineering internships in Dublin (or remote).

EXPERIENCE

Full-Stack Developer Summer Intern | Honeycomb Software

06/2022 – 09/2022

- Developed and tested 3 core features using React and .NET for a production web application, improving overall stability and user experience.
- Integrated REST APIs connecting the React frontend with .NET backend services for a production web application used by 100+ users, enabling seamless real-time data flow.
- Worked in a small Agile team (5 devs), joining daily stand-ups, sprint planning, and code reviews to hit project milestones.
- Resolved 10+ production bugs under tight deadlines, reducing customer-facing incidents by 40% and enhancing system reliability.

EDUCATION

Dublin City University — Bachelor of Science in Computer Science

Dublin, Ireland · 09/2024 – 05/2028

- Achieved First Class Honours (1:1) GPA in Year 1
- Received the [Datalex "Best Project" Award 2025](#) for a DCU DIME project

STEP Computer Academy — [Software Development Diploma](#)

12/2019 – 06/2022

- Graduated in the top 1% of the software engineering cohort.

Cathal Brugha College — Computer Systems & Networks

Dublin, Ireland · 09/2023 – 05/2024

- Earned 8/8 distinctions, receiving the highest grade in every module.

PROJECTS

Menu+ — QR Menu Builder CMS [Live](#) | [GitHub](#)

- Replaced paper menus with dynamic QR codes, eliminating 100% printing costs (Python FastAPI, Supabase)
- Built intuitive drag-and-drop editor cutting menu updates from hours to minutes (React, TailwindCSS)
- Integrated WhatsApp ordering with real-time notifications reducing waiter workload 50%+

JobsDublin.ie — Irish Job Board Platform [Live](#) | [GitHub](#)

- Built REST APIs (23+ endpoints) + PostgreSQL database handling 100+ vacancies with search and pagination
- Implemented full CRUD for users, companies, and applications using object-oriented programming (FastAPI)
- Developed scalable employer dashboard with real-time applicant tracking and SQL analytics (React)

Online Classifieds Platform — Team Lead Project [GitHub](#)

- Led 7-person team building classifieds platform with authentication, role-based authorization, and advanced search
- Designed PostgreSQL database schema (14 tables) with ASP.NET Identity + Entity Framework ORM
- Built ASP.NET Core REST APIs + React frontend with complex relational SQL queries and CI/CD pipeline

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, Python, C#, C, C++
- **Frontend:** React, Redux, React Router, HTML5, CSS3, TailwindCSS, Bootstrap, shadcn/ui
- **Backend & APIs:** ASP.NET Core, .NET, FastAPI, Django, REST API design, JSON
- **Databases:** PostgreSQL, Supabase, MySQL, SQL, ORM
- **DevOps & Tools:** Git/GitHub, Docker, Linux, Vercel, Render, Postman, CI/CD, AWS/Azure
- **Web & Software Engineering:** Authentication & Authorization (JWT, cookies), CORS, Responsive Design, basic Web Accessibility (WCAG), OOP, Agile and Scrum Methodologies, Testing & Debugging
